

## ERRATUM

In Brookhart & Cushing (2002, *Journal of Arachnology* 39:84–97), the type locality for the male holotype of *Eremobates gerbae* was erroneously stated as: Rincon Mountains, Cochise County, Arizona, collected August–8 October 1995. The Rincon Mountains are in Pima county not Cochise County and the holotype was collected 30 August 1994. The female allotype of *E. gerbae* was also collected in the Rincon Mountains in Pima County and was collected on 8 October 1995.
